Re: Water Right No. 37-21400

Dear Mr. Peppersack:

I received your July 21, 2011 letter concerning the continuation of the water right for the Picabo Water System. This water right is vitally important to the citizens of the town of Picabo since it is the only source of water for the town. The spring surface water right was abandoned several years ago because of the deterioration of the several miles of pipe line that brought the water to town and its declining flow.

This letter's purpose is to urge you to perfect this water right as a dependable right that will allow Picabo to continue using this right for the foreseeable future. The spring right will not be use in the future, and if it has any value as mitigation for the ground right# 37-21400 that might be an option to consider.

Thank you for your consideration of this matter.

Sincerely,

Nick Purdy
Operator Picabo Water System
