Subject: City of Driggs Permit

Craig,

I talked with Jeff about the City of Driggs permit you're addressing. He feels, like I do, that the original version of App. Processing Memo 18 provides "preferences" to cities, not to other entities with limited places of use. However, he can see how the permit holder may have expended funds to install 2.00 cfs of capacity with the expectation that the permit would be issued for that amount. We are wondering how the system operated before it was connected to the city system. It doesn't seem logical that the developer would have pushed 2.00 cfs through the system to serve only the Valley Center. So, Jeff's first inclination is to issued the license with a limited rate and volume. He is willing, however, to issue the license for 2.00 cfs and a limited volume if we have evidence that 2.00 cfs of capacity was installed and diverted prior to proof being submitted.
