Thanks Tim for taking the time to clarify this issue. We will be submitting a water supply bank lease application to Monica on behalf of Salmon Falls L&L in the near future.

I did speak to Zach and he confirmed that the 18 acres of land in question that I had identified are in a QQ (NESW 7 8S 14E) owned by the BLM and not included in the POU water right description ( I looked at the rights and confirmed that this QQ is not described). The acres appeared to be irrigated as per 2009 NAIP imagery and Zach confirmed that they may have been irrigated that year but have since been taken out of production. I reviewed available Landsat imagery from 2010 and it appears that the land in question was not irrigated. I don't believe any further action is necessary concerning the 18 acres in question. The owner may certainly want to proceed with the water supply bank application with respect to those authorized number of acres not irrigated or included in the current POU shape file.

Hi folks,

I talked to Zach a couple of times this morning. He is going to discuss the 18-acre discrepancy with Tim (I just transferred him to Tim's line, actually). Additionally, they do anticipate offering the remaining acres to the Bank. They will submit the 2,432 authorized POU shape at the same time as the Bank application(s), which should be within the next

couple of months. The Bank application will also be submitted with an additional shape/map of the precise acres to be offered to the Bank. I've also copied Zach on this email so he can chime in if I missed something.

Please note there about 18 acres not included in the POU shape file but they probably are included in the tabular POU file, so the POU shape file should at least be updated for those approximate 18 acres.

Tim,

The 2038.0 acres shape is what was submitted for the right holder by Brockway Engineering. We sent a letter on 01-13-2011 identifying the discrepancy of 394.0 acres and possible forfeiture in the future. There is no response in the file.

Monica is going to give Zach at Brockway's a call & see if the right holder might want to place that portion in the Water Supply Bank and/or identify additional acres for actual irrigation within the 2668 acre ppu. If placed in the bank the acres will also be identified as a part of the 2432 authorized pou shape. At a minimum we should get an updated shape from them for all the authorized acres.
