Jean,

Coordinates for the Elk Creek GS well are N 44* 25.305 x W 115* 24.392. Hope this is what you were looking for?.....John

Thank you. This is very helpful. Is it possible for someone to GPS the well location? The well log location and the point of diversion location on the permit don't match. I'm pretty sure the well log is wrong but I need to verify it. We prefer the GPS reading be in Degrees Decimal Minutes if possible.

Thank you.

Jean Hersley

The Maximum people staying at Elk Creek from July 10 to September 10 would be 24 people. Generally its limited to 21 but I included a prevention person, a campground host and a road maintenance person who may or may not be there from year to year and likely not all season. Sorry I didn't respond sooner but I don't remember getting this letter.....John

Steve,

On July 6, 2011, the Department of Water Resources requested additional information for the above mentioned water right so we could continue the licensing process. As of today, I haven't heard back on this request.

I need the maximum number of people per day that use the Elk Creek Guard Station and the maximum number of days per year it is used.

Thank you.

Steve,

The Department of Water Resources is in the process of licensing water permit 77-14339. We need additional information before we can continue this process.

Can you provide me with the maximum number of people per day the use the Elk Creek Guard Station and the maximum number of days per year it is used?

If you have any questions, please call our office.
