

MEMORANDUM

Date: August 26, 2011
To: File
From: Nick Van Dyke
Re: Combination of Transfers 73717 and 73718 onto single approval document

Both transfers 73717 and 73718 were originally submitted at the same time (October of 2005) to accomplish the goal of 4 things to right 47-8011A:

- Change the nature of use for a portion of the right from irrigation to stockwater/commercial
- Correct the location description of the points of diversion to accurately reflect the system
- Change the place of use for the remaining irrigation
- Convert the remaining irrigation from supplemental to primary

The changes could have been made on one application but due to the length of time from submittal to processing, and to the multiple amendments to the applications, it was decided to keep it to two applications. Furthermore it was decided to list both application numbers on one approval: The approval lists the right as it was described before both transfers, and describes the right after all changes.
