Cherie Padella
1 DWR - in person.

Dear Cherie:

Regarding your letter of July 29, 2011:

1) I hereby request a ~~five~~ ^{five}-year extension of time to prove-up usage on my geothermal well 65-13913. Enclosed is "Request for Extension."

2) I hereby ~~refer to~~ ^{refer to} the final requirement to "prove" usage and meet hearing requirements on geothermal spring permit 65-13912, to wit, a drawing showing proposed work for September 9th, 2011 (on or near that date) to place 2" pipes from this spring and the above well from outlet pipes to the Pancheri property line. These will be black plastic.

For further discussion of work accomplished, please see my letter to Gary Spackman on Nov 4, 2009.

Please note that compliance with terms of the hearing is complete AND that since then my request for much less water for the spring changed the permit so my usage as proved in the addendum to the 11/4/09 letter with the graph of field tests is less than my water right.

Thanks.
