Hi T.J.,

Nick Van Dyke pulled this out of his files. It looks like we are holding the application for permit for 13-7694 until we receive the information Shelley requested.

The Bank can possibly approve the annual topping off of the reservoir (pending receipt of the Bank rental application), but perhaps your client wishes to pursue the first or third option for the permanent maintenance of the reservoir.

Monica

T.J.,

After talking with you this afternoon, I initiated a little more in-house discussion and was persuaded to change my response to your question. To complete the Maple Leaf Investments package, we'll need the following:

- An application for 52 AF to maintain that volume in the reservoir perpetually. This is the part that I thought would not be needed.
- A WSB lease/rental package for 52 AF for the initial fill of the reservoir. This essentially mitigates for the initial 52 AF diverted under the permit.
- A transfer to cover the annual topping off of the reservoir. This essentially mitigates for the losses from the reservoir.

Please call if you have questions.
