

MEMORANDUM

TO: File 67-7937

FROM: KAY WALKER 

RE: Point of Diversion

Date: November 14, 2003

.....

The Corps of Engineers requested the permit holder change the point of diversion under this permit to another location, on her property, within the same 40-acre tract that is currently being reviewed for licensing. In discussing this with Lori Graves and Shelley Keen this morning it was determined that we should issue the license as shown on the field exam and then the right holder could adjust her point of diversion to the new location without needing to file an application for transfer. We reviewed the transfer processing policies & procedures memo and did not find anything that indicated the right holder would need to file a transfer to "move" her point of diversion. Lori had received copies of documents the permit holder has received from the Corps and she left those in our file for future reference.
