RE: Application for Permit 63-33496

Dear Mr. and Mrs. Hill:

We are reviewing the above referenced application for permit that you submitted in April of this year. In our review we find we need to know what water bearing zone you plan to divert water from. It appears from the driller's log that you could divert water from 450 feet to 548 feet. Please complete this statement and return it to my attention at your earliest convenience.

Water bearing zone to be appropriated is from 450 to 548 feet. *← per phone conversation 6/17/11 - KW*

Upon review of your application, we found that the drilling permit fee paid in June of 2008 is not sufficient for this proposal. The fee paid was for a domestic well for one home. The correct fee for a drilling permit for a well to be used for irrigation purposes is \$200.00. Since only \$75.00 was previously paid, we request that you submit an additional \$125.00 to upgrade the drilling permit fee. Please note on your check that the money is for "Well Tag No. D0052871". If you do not upgrade the drilling permit fee, we may withhold licensing of your development in the future.

Pd. under Receipt # W039154. -

Please submit the requested information for application processing to continue. You may seek additional time to provide the information by making a written request to interrupt processing for up to six months. Your response including the requested information or a request for more time to seek the information must be received within 30 days of the date of this letter, or by September 12, 2011. The application will be voided without a timely written reply.

If you have any questions regarding this matter, please do not hesitate to contact me at (208)334-2190.

Sincerely,

KAY WALKER
Sr. Water Resource Agent
