Cherie,

I think Mr. James will appreciate seeing a draft approval prior to formally acknowledging forfeiture of the 4.8 acres. Perhaps you can caveat your draft as just for discussion purposes or something like that so you are comfortable in sharing it without a prior acknowledgement by Mr. James.

It is important to him to have assurance that a right reduced by 4.8 acres (perhaps more if additional mitigation acres let's him operate the pond after his irrigation rights are out of priority) allows his facility to continue functioning.

Because I reported to him after our last meeting that he could expect the reduction in acreage, he is aware that the draft approval will be for fewer acres than listed in the application, and you can expect that he will not object if he can live with your draft determination.

Your help is appreciated.

Norm

Norm,

I took a look at transfer 74253 and seemed to recall that I was waiting on information that addresses the possible forfeiture. My findings indicate that a total of 9.6 acres in the original POUs for the rights involved in the transfer were forfeited. However, the applicant will get credit for 4.8 acres that are within the SWNW of Sec 2 since those acres are part of the proposed PPU. If you'd like I can proceed with processing this application using the numbers that I came up with, which means that 4.8 acres will be forfeited. If that is agreeable, it would be helpful if the applicant acknowledges the forfeited acres in some manner so it doesn't become an issue later. In the meantime, I will get going on drafting an approval.

I will meet with Mat Weaver regarding the proposed mitigation for 72-16625 to make sure this is an option.

Thanks for your patience.

Cherie

Cherie:

Just following up on the status of this matter.
