RE: Transfers 76136 & 77102 (irrigation/surface water diversions)

Dear Mr. Dewsnup:

Thank you for returning the signed transfer application (77102) and fees promptly. We should be able to advertise and complete the processing of both transfers very soon.

I also wanted to let you know about the following additional requirement. IDWR has determined in those transfer situations where there is proposed to be a Permissible Place of Use (PPU) created with an acre limit less than the PPU acres where IDWR is going to apply the 206 condition or some variation of...

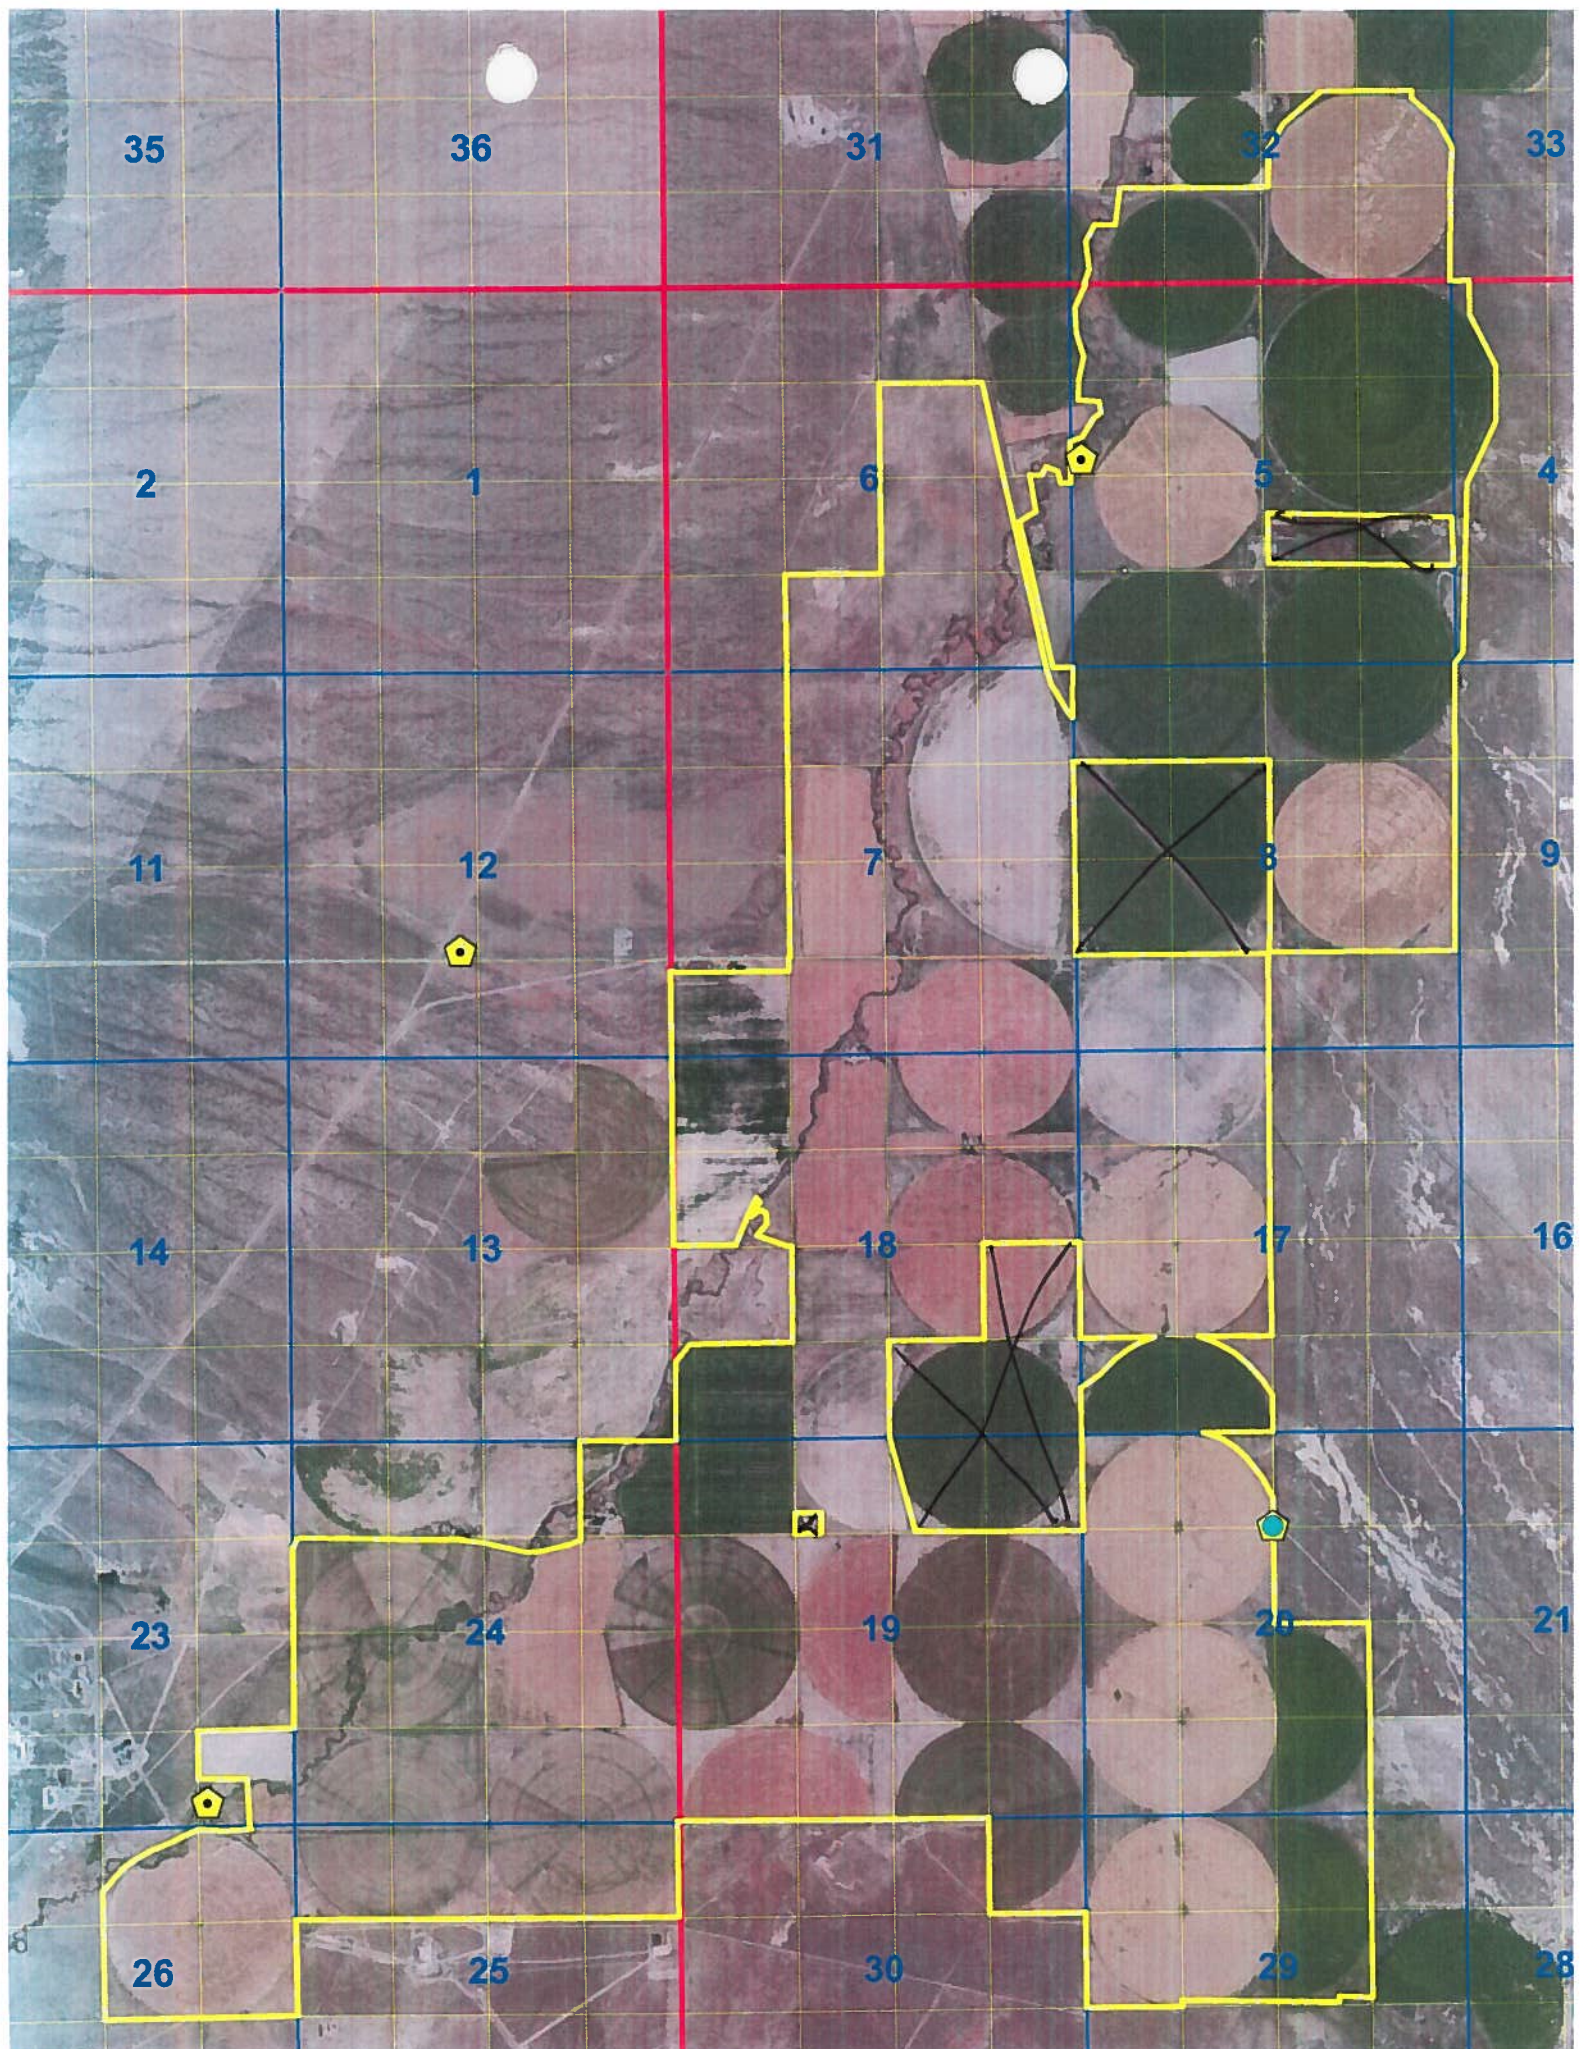

This right is limited to the irrigation of a specific <688.0 acres> within the <912.6 acre> place of use authorized by this right in a single irrigation season. The specific <688.0 acres> to be irrigated by the right holder <shall be identified prior to use by submittal of a land list and a representative electronic shape file or by submittal of a land list and a map sufficiently detailed to allow creation of an electronic shape file to be associated with this right> <are shown in the electronic shape file associated with this right> in the geographic information system component of the water rights database maintained by the department. Before changing the <688.0 acres> to be irrigated within the <912.6 acre> place of use, the right holder shall submit a new land list and representative electronic shape file or map to the Department prior to the irrigation season in which the change will occur.

Your transfers identify of total PPU of 4,907.4 acres and will be limited to 4,227.3 irrigated acres within any one irrigation season. Please submit a land list and map showing where the 4227.3 acres within the 4907.4 ac PPU will be located. (I have enclosed a recent aerial photo of your farm and crossed out the areas which are not included in the 4907.4 total place of use. You can draw around the pivots and other fields to be included for the 4227.3 acres within if that would help.)

We will hold approval of the transfer until the requested information is provided. If you have questions, feel free to contact me at the office.

Sincerely,

Jeanie Robertson

RE: Transfer 77102 (irrigation/surface water diversions)

Dear Mr. Dewsnap:

Since I did not receive this transfer application by July 1st, I was told we would have to charge the new fees which were passed by legislation and went into effect on July 1st. I spoke with Sam Garner when he called on the first of July and told him the fees would be \$2700.00 instead of the original \$740.00 under the old fee schedule.

After going over the situation with our State Office folks, it was decided that we could make an exception here since we could consider this new application as amending Transfer 74136 by adding the surface water rights to the same system and place of use.

Return the signed application to our office within the next ten days, or by July 22nd, and we will accept the old rate of \$740.00. If I do not hear from you I will assume you no longer wish to pursue these transfers and will return both transfers (76136 & 77102). If you decide to re-file the transfers later, the fees will be based on the new schedule and the 91.55 cfs would equate to \$4900.00. If you decide not to file these transfers, there could be compliance issues in the future with the wells being tied together and the rights not described that way.

If you have any questions, feel free to contact me at the office at your convenience.

Sincerely,

Jeanie Robertson

RE: Transfer 77102 (irrigation/surface water diversions)

Dear Mr. Dewsnap:

Enclosed is a new transfer application, 77102, requiring your signature on page 4. I have been working with your son, Garrett, preparing this transfer. It is actually a companion transfer to 76136, the large irrigation transfer you filed in 2009 which combined all of your groundwater rights for the combined irrigation of 4,907.4 acres. When we started processing that transfer, we found that you also needed to include your surface water rights as the acres from the groundwater and surface water rights often overlapped and were combined in the same irrigation system. This transfer combines the 28 surface water rights, diverted from Raft River, Clear Creek and Cottonwood Creek on those same 4,907.4 acres. The four points of diversion are shown on the attached map, two from Raft River and one each from Clear Creek and Cottonwood Creek. (Cottonwood Creek flows into and is then rediverted from Raft River.)

Please sign and return this application to my attention along with the additional fees of \$740.00. (You originally paid \$1,710.00 for the ground water rights and their combined diversion rates of 54.67 cfs. With the addition of the surface water diversion rates, the new combined total is now 91.55 cfs. This fee would be \$2,450.00. Minus the \$1710.00 already submitted leaves a balance due of \$740.00.) I should mention that as of July 1st, our fees are going up and this amount will likely double. If this application and fees are not received before July 1st, the new rates will be in effect.

If you have any questions, feel free to contact me at the office at your convenience.

Sincerely,

Jeanie Robertson
Senior Water Resource Agent
