5. General Information:

a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future: The diversion system will include 22 existing wells, three of which are not currently operable and one new well. The diversion system will be equipped with measuring devices as specified by IDWR. As a result of this transfer, all irrigation pipelines will be tied together to allow for the movement of water from any point of diversion listed in the transfer to any permissible place of use listed in the transfer.

b. Who owns the property at the point(s) of diversion? The applicant
If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system: _____

c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts?
If yes, ☒ Attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it **Attachment #6**. List the name of the entity and type of lien: Farm Credit West FLCA

It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on this application may result in rejection of the application or cancellation of an approval.

d. Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer: The vast majority of land that is currently irrigated will continue to be irrigated, with the exception of a few pivot corners which may not be irrigated depending of crop rotations and water availability.

e. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use: See attachment 5e.

f. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

Attachment 5e

Based on two pending water transfers, portions of water rights 43-2387 and 43-10806 are currently being transferred for use on an existing feedlot and a newly proposed dairy facility. The portions that are being transferred have not been included in this transfer. Only the diversion rate and volume that will remain after the feedlot and dairy transfers are approved has been included in this transfer. The current point of diversion for 43-10806 will serve as a point of diversion for both the dairy, and the irrigation rights included in this transfer. One of the wells that currently serves as a point of diversion for 43-2387 will serve as a point of diversion for both the dairy facility and the irrigation rights included in this transfer.
