Re: Notch Butte Farms LLC Transfer

Dear Mr. Cefalo:

It is the desire of Notch Butte Farms LTD to update their current place of use for water rights 34-10895, 34-12365, 34-490, 34-459 and 34-374B. The beneficial use, period of use and points of diversion will remain the same for all water rights in this application.

The irrigation for surface water rights 34-12365, 34-490, 34-459, and 34-374B is 188.0 acres. The combined limit of the surface water rights and ground water right 34-10895 is 229.0 acres. Correspondence between Notch Buttes Farms LTD representative, Fritz Haemmerle, and Deputy Attorney General Idaho Department of Water Resources, Garrick Baxter has indicated that Notch Butte Farms LTD can proceed with this transfer to correct the place of use of these water rights. No additional information or correspondence from neighboring property owners is required.

It is further requested that due to no change in beneficial use, period of use, points of diversion or ownership of the water rights that this transfer not be advertised.

Please copy our office on all correspondence regarding this application.

Sincerely,

Greg Sullivan, M.S., E.I.T.
