Subject: Trust Water Letter for 36-7456B

To File

Jana,

I finally had some time to look into your question about 36-7456B. IDWR mailed the trust water letter to the owner of 36-7456B intentionally. There were a number of trust water rights that had the condition removed unintentionally in the SRBA process. Our notes on this right indicate, "TW condition on order, license and recommendation (version 1), not on decree." It still remains to be seen if the court decrees amount to determinations that this right and others like it are not trust water. Meanwhile, the right owners should be aware that their rights may be considered trust water rights, and trust water rights will be evaluated in the not-too-distant future.

Shelley used two codes, think it was R55 and then another one I can't remember. So Shelley will be back tomorrow and he'll have an answer. Sorry threw my not away. Isn't this fun!

Hey Danni,

I had a call from a water right owner that received a trustwater letter.. the right is 36-7456B. The right did not have the trustwater language on it and the priority was too old. I told him to discard the letter, but I was curious if you can figure out how he was placed on the list in the first place. Wasn't that query based on the trustwater condition?

Just curious.- Jana☺

Subject: Trust Water Letter List

Wendy asked if I had one. This is simple sheet I used to check for condition codes. I didn't pull in the suffix of the water rights, but think you can figure them out. Hope it helps.
