RE: Installation of Pipe

Carol MacGregor called today and left me a voicemail. Carol stated that she doesn't know the length of pipe that she will be installing because swampy conditions are making it impossible to begin the installation of the pipe.

On January 31, 2011, I called Carol and left a message on her voicemail. I told her that she can submit the specification of the pipe when she submits proof of beneficial use. I reminded her that the proof should be submitted once her pipe is installed.
