Chuck and Jim,

I was able to touch bases with Michele this morning about Permit 37-8388, and we want to make sure you have plenty of time to review her licensing memo. We'll look for your response by August 12, 2011, which is the end of the workweek that starts on August 8. If we haven't heard from you by August 12, we'll do what we can to get the license issued as drafted, although the question of watermaster control still should be answered. If it gets close to the 12th and you need more time, please call or email.

I'll put a copy of this message in the water right file so our plan is available to everyone.

Sincerely,

Shelley Keen

Shelly: I received a copy of the draft license for this right from Michele Edl and a copy of her licensing review memo. Needless to say the memo is extensive and the changes to the recommendations in the beneficial use exam report are significant. We are reviewing the documents and comments and would like to request at least until August 8 to conduct an analysis and prepare a response prior to the issuance of a license. I understand you will be back in the office on Thursday, July 29. If you could let me know relative to a time to respond, I would appreciate it.

Thanks for your efforts.

Chuck
