FROM: KAY WALKER 

RE: License Recommendations

Date: February 8, 2002

.....

In review of these permits for licensing, I found that the amount of water to be licensed should be the amount previously decreed. In looking at the decrees, I found Rts. 36-00001 and 36-00002 were decreed for use of Riley Creek. The two decrees equal 22.45 cfs, which is the amount I recommend we license under both of the permits from Riley Creek. This is the same approach taken on other rights being licensed for Buckeye Farms concerning their overlapping rights. The way I read these water right files, the intention was to develop new uses from their decreed rights, not develop new water.

Comment Report

36-8729

1. kwalker 2/7/2002 Place of Use

Comment: When I updated GIS with the shapes Dan created for the place of use, I found that a little bit of a pond was located within the NWNW, S35, T7S, R13E. Dan had not included this tract in his recommended place of use but I am going to add it since GIS found it to be a part of the place of use.

2. CZIMMERM 6/15/1994 ADDITIONAL INFORMATION

Comment: This permit was created to reflect the request for the additional amended uses as identified in permit no. 36-07741. Since adding the new uses would have required advancement of the priority date of permit no. 36-07741, a new application filing is needed for the additional uses. The priority date of this right is set at the date the amendment to permit no. 36-07741 was received.
