RE: Water Right Permit No. 36-7741 and 36-08729

Dear Permit Holder(s):

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. The examiner who verified your water use reported that certain elements of the permit have been developed differently than described on your permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

Based on the examiner's report, the following elements were developed differently than described on your permit:

 X Place(s) of Use

The enclosed Application for Amendment forms depict the elements of the water right as they will appear on the license when it is issued. Please review the amendment forms carefully. If you concur with the information presented, please sign the form and return it with the within 14 days.

By submitting the enclosed applications for amendment, IDWR will consider it a request to withdraw the original amendment to 36-8729 received on May 10, 2002, and replace it with the new amendment. Fees paid in May of 2002 will be applied to the current applications for amendment so no additional fees are required.

Fees for the enclosed amendment for 36-7741 were paid in 2002 recorded under receipt number C061971, but the amendment was never actually signed. Those fees will be applied to the enclosed amendment to 36-7741.

If you have any questions, please call me at <phone>.

Sincerely,

Craig L. Saxton
Water Rights Supervisor
