

MEMORANDUM

Application for Permit #65-23447- Skeen

From: J. Westra

Date: 07/19/11

RE: Re-advertisement

The application will need to be re-advertised due to an oversight on my part as processor. In a meeting with Steve Lester prior to the application filing, the applicant discussed the ponds were located in the stream channel, and would also be storing stream surface water in addition to the ground water source moving upward into the ponds (2). I confirmed the additional surface water source by telephone with the applicant on 07/19/11. The ponds already exist.

A comment letter should be sent to the 65A Squaw Creek Watermaster
