RE: Licensing Review Memo

Timeline:

Application Received: May 5, 1995

Permit Issued: September 29, 1995

Proof of Beneficial Use: August 6, 1997

Field Examination: June 23, 1999

Point of Diversion: There are two wells that serve the Goose Creek Storage/Units and Trailer Court.

Overlap Analysis of PD: No other rights divert from the PDs that are associated with this right.

POU: Water is needed for domestic uses in the trailer park and for bathrooms and a washing machine at the store. It does not look like a bar was ever developed so it was eliminated from the conditions of approval.

Overlap Analysis of POU: The POU falls within the Brundage Water Users Assn Inc. There are not any other water rights that cover the POU.

Volume and Diversion Rate: This right will be licensed with the diversion rate and volume that the field examiner recommended.

Ownership: It appears that a new owner may own the POU. The license will be cc'd to:

Todd Simpson
13864 Nisula Rd
McCall ID 83638

Amendment?: No. The POU and PD have been developed as permitted.
