Nick-

Here is the revised 73-255 POU shapefile. Let me know if you need any additional changes.

Thanks,
Court

Subject: Big Springs Transfers/Exchange

Court,

I'm finalizing the approvals for these applications and do need one more thing. Transfer 77204 is changing the place of use for right 73-255 so that it can be used in both its current recorded place of use or alternatively in the pivots, creating what's referred to as a PPU (permissible place of use). With PPU's the following condition is applied (acre amounts specific to 77204):

This right is limited to the irrigation of a specific 130 acres within the 276.5 place of use authorized by this right in a single irrigation season. The specific 130 acres to be irrigated by the right holder shall be identified prior to use by submittal of a land list and a representative electronic shape file or by submittal of a land list and a map sufficiently detailed to allow creation of an electronic shape file to be associated with this right in the geographic information system component of the water rights database maintained by the department. Before changing the 130 acres to be irrigated within the 276.5 acre place of use, the right holder shall submit a new land list and representative electronic shape file or map to the Department prior to the irrigation season in which the change will occur.

The reason this condition is applied is to help the local watermaster in administering rights. Previously IDWR didn't request a shapefile or map before signing off on the transfer; however experience has shown nothing is ever submitted. Thus we are starting to require a shapefile or map before a transfer can be approved. Please send me a shapefile or map indicating specifically where 73-255 will be used w/in the 276.5 acres. Thanks.

Nicholas Van Dyke
