Re: Transfer approval

This transfer proposes to add a point of diversion for ground water right 21-7442; this right will now have four points of diversion. The new point of diversion is meant to satisfy an IDEQ public drinking water system standard.

Water right 21-7442 & 21-7583 have conditions setting a combined diversion rate of 0.28 cfs which have been carried forward. In addition the condition limiting the amount of homes to 70 has also been carried forward.

Authority to File:

The applicants are the current owners of water rights per IDWR record. According to Fremont County taxlot data (updated October 4, 2010), Patricia McKain is the current owner of the Point of Diversion. Forfeiture is not an issue.

Injury to Other Water Rights:

The point of diversion or place of use is not located within the Eastern Snake River Aquifer, no ESPA Model analysis is required. The transfer was advertised on June 23 and June 30, no protests were received. No injury issues identified.

Enlargement of Use:

No issues identified.

Local Public Interest:

No issues identified.

Beneficial Use / Conservation of Water Resources:

No issues identified.

Review of the application finds there is not clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
