Dan,

No lands in Section 1 will be irrigated. All lands for both the outline you have in yellow and in Green need to go the the water bank except the 1/4 pie shaped piece in the southeast corner of the green polygon that is part of an operating pivot in section 6.

If that is not clear I can send you another map.

Jim

Subject: Questions on Map

Hello Jim,

The map that you sent me shows ground on the north side of the Springs Creek as part of the ground to be retired for the your Water Supply Bank lease for water rights 34-469 and 34-471. Unfortunately, that ground has no water rights. The 40 acres of this water right actually covers the southeast corner of the pivot in Section 1. Water rights 34-467 & 34-468 cover the other 3/4's of that pivot. The 40 acres under this pivot are the only acres under 34-469 & 34-471 in section 1. I have attached an map to this email to hopefully explain what is going on. All I will really need from you is to let me know if the ground being irrigated in Section 1 is the actual ground to be placed in the water supply bank. You can make that confirmation in an email if you wish.

Thank you.

Ps: I will send this email separately in-case the map won't go. If that is the case, then please give me a call.
