WESTERN REGIONSTATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
APPLICATION FOR PERMIT
To appropriate the public waters of the State of IdahoIdent. No. 63-334541. Name of applicant(s) City of Boise, Department of Parks & Recreation Phone 208.384.4240
Name connector (check one): ☐ and ☐ or ☐ and/orMailing address: 1104 Royal Blvd City Boise
State ID Zip 83706 Email: bpr@cityofboise.org2. Source of water supply Groundwater which is a tributary of **AMENDED***

3. Location of point(s) of diversion:

Twp	Rge	Sec	Govt Lot	1/4	1/4	1/4	County	Source	Local name or tag #
3N	2E	15	3		NW	NW	Ada	Groundwater	

4. Water will be used for the following purposes:

Amount .15 for Municipal purposes from 3/15 to 11/15 (both dates inclusive)
(cfs or acre-feet per year)Amount .25 for Municipal Storage purposes from 1/1 to 12/31 (both dates inclusive)
(cfs or acre-feet per year)Amount .02 for Div to Municipal Storage purposes from 1/1 to 12/31 (both dates inclusive)
(cfs or acre-feet per year)Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)5. Total quantity to be appropriated is (a) .15 cubic feet per second (cfs) and/or (b) 5 acre-feet per year (af).

6. Proposed diverting works:

a. Describe type and size of devices used to divert water from the source. 145 foot well, 7.5 HP submersible Franklin pump to pressure tank to buried pressurized irrigation system and ponds.b. Height of storage dam n/a feet; active reservoir capacity _____ acre-feet; total reservoir capacity _____ acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 11.For dams 10 feet or more in height OR reservoirs with a total storage capacity of 50 acre-feet or more, submit a separate Application for Construction or Enlargement of a New or Existing Dam. Application required? ☐ Yes ☐ Noc. Proposed well diameter is 8 inches; proposed depth of well is 145 feet.d. Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☒ Noe. If well is already drilled, when? October 1992; drilling firm Bill Doty;
Well was drilled for (well owner) Morrison-Knudsen; Drilling Permit No. 63-92-C-0773-000.

7. Description of proposed uses (if irrigation only, go to item 8):

a. Hydropower; show total feet of head and proposed capacity in kW. _____

b. Stockwatering; list number and kind of livestock. _____

c. Municipal; show name of municipality or the applicant's qualifications as a municipal provider. City of Boise

d. Domestic; show number of households _____

e. Other; describe fully. Municipal storage is for five aesthetic ponds at Platt Gardens. Total surface area of the ponds is approximately .14 acre. Ponds are 18 inches at their deepest point, resulting in de mimimum storage.* PER ATTACHED WORKSHEET
-JR

8. Description of place of use:

a. If water is for irrigation, indicate acreage in each subdivision in the tabulation below.

b. If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
3N	2E	15						M											
		15						2											2
		16	M																
		16	3																3
		16	MS																

Total number of acres to be irrigated: 5.0

9. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping? N/A

10. a. Who owns the property at the point of diversion? City of Boise

b. Who owns the land to be irrigated or place of use? City of Boise

c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing: _____

11. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary. Municipal use is for the irrigation of 5 acres at Platt Gardens and the grounds of the adjacent Boise Depot. Municipal Storage is for 5 aesthetic ponds located in Platt Gardens. Rate of flow is higher than IDWR standards because of short irrigation window at this site (day and night use of property precludes irrigation during most of the 24-hour day.)

12. Time required for completion of works and application of water to proposed beneficial use is 1 years (minimum 1 year).

13. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½" x 11" map clearly identifying the proposed point of diversion, place of use, section #, township & range. A photocopy of a USGS 7.5 minute topographic quadrangle map is preferred.

The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

WATER RESOURCES
WESTERN REGION

APPLICATION 63-33454 WORKSHEET

The applicant confirms the details described below.

Municipal use from 1/1 through 12/31 at 0.15 cfs.

Municipal use includes irrigation of about 5 acres plus 5 minor ponds at the Platt Gardens, Boise Depot.

Ponds cover about 0.14 acre at about 1.5 ft. deep. The approximate 0.21 af capacity (0.14×1.5) can be filled within the IDWR "24-hour rule of thumb":

- $\text{cfs} \times 2 = \text{af per day volume} = 0.15 \times 2 = 0.3 \text{ af}$
- 24-hour fill volume exceeds pond capacity volume
- storage use n/a for proposed water right.

Municipal place of use is NWNW Sec. 15 & NENE Sec. 16. It is not necessary to list irrigated acres and ponds separately in the place of use chart since those uses are covered under municipal use.

A clarifying condition of approval will note that municipal use includes irrigation plus filling and maintaining 5 minor storage ponds.

Water bearing zone to be appropriated is 130-140 ft. (fully cased existing well 145 ft. deep, screened at 130-140 ft.).

This worksheet amends the application as noted above.

SOUTH BOISE MUTUAL IRRIGATION COMPANY LTD

RESOLUTION

WHEREAS South Boise Mutual Irrigation Company is an irrigation company organized pursuant to Idaho statute; and

WHEREAS South Boise Mutual Irrigation Company holds water rights 63-242B, 63-243F, 63-243G, 63-280, 63-281, 63-282, 63-283A, 63-284A, and 63-2392E; and

WHEREAS South Boise Mutual Irrigation Company delivers water pursuant to its water rights to its members for irrigation and other purposes; and

WHEREAS the City of Boise is a member of the South Boise Mutual Irrigation Company and wishes to purchase additional share by acquiring additional shares in the South Boise Mutual Irrigation Company for purposes of mitigating the irrigation of five (5) acres of land at the Boise Depot and Platt Gardens, in conjunction with Application for Permit;

NOW THEREFORE BE IT RESOLVED:

1. The Board of the South Boise Mutual Irrigation Company LTD, hereby agrees to issue shares equivalent to the irrigation of five (5) acres to the City of Boise for mitigation purposes, pursuant to Idaho Code. The number of acres may be adjusted according to the findings of the IDWR during the water right licensing processes.
2. It is further resolved that, as long as the City of Boise pays the assessments associated with the mitigation shares, the South Boise Mutual Irrigation Company agrees not to irrigate five (5) acres of lands within its authorized place of use using the water represented by these shares.
3. The IDWR is authorized to note in the record of water right 63-283A that the water represented by the mitigation shares will not be diverted from the Boise River.
4. The assessments for the South Boise Mutual Irrigation Company mitigation shares will run with the land (the Boise Depot and Platt Gardens).

It is so resolved the 27 day of OCTOBER, 2010.

Hal Maxey, President,
South Boise Mutual Irrigation Company LTD.

BOISE, ID 83706-2898

Point of Diversion L3(NWNW) S15 T03N R02E ADA County Source GROUNDWATER Tributary BOISE RIVER

Use: MUNICIPAL 01/01 to 12/31 0.15 CFS

Total Diversion: 0.15 CFS

Date Filed: 11/22/2010

Place Of use: MUNICIPAL

T03N R02E S15 L3(NWNW)

T03N R02E S16 NENE

Water bearing zone to be appropriated from an existing well is from 130 to 140 feet. Use is for Boise Depot and associated Platt Gardens.

Consumptive use for shallow well considered tributary to the Boise River is provided by retiring 5 acres of irrigation under South Boise Mutual Irrigation Company. This will be done by leaving 0.10 cfs from senior water right 63-283A undiverted in the river. The irrigation company rights are diverted via the Bubb Canal in southeast Boise.

REX BARRIE
WATER DISTRICT #63
PO BOX 767
10769 W STATE ST
STAR, ID 83669-0767

RE: Application for Permit: 63-33454

Dear Mr. Barrie:

A copy of the above referenced application is enclosed. A computer generated copy of the application is also attached. *The highlighted areas on page 2 contain additional information, for your reference.* Please review the application, then complete the enclosed recommendation form and return it to this office within 21 days of the date of this letter.

If the application is approved, IDWR will include appropriate standard conditions of approval for a water right located within a water district, such as regulation by the watermaster, lockable controlling works, and/or measuring devices. Any special conditions or other concerns you have related to this application should be specifically addressed in your recommendation.

IDWR's regional offices can finish reviewing an untested application as soon as the protest period has past. Your prompt response to this request will ensure that your recommendation can be considered. If IDWR has not received your written recommendation within 21 days from the date of this letter, IDWR will presume that you do not oppose approval of the application and that you have no comments for IDWR to consider.

Sincerely,

Denise Buffington

RE: Application for Permit No. 63-33454

Mr. Lester,

Per your letter of April 20, 2011, please find enclosed the Application Worksheet for the above-referenced Application for Permit. The Worksheet documents the simplification of the Municipal uses described in the application.

The Department concurs with the simplified description of the proposed water use. The documentation in IDWR's files will clarify the details of the water use under the Municipal umbrella.

Thank you very much for your assistance with this Application. Please contact this office if you have any questions or need additional information.

Sincerely,

Maria Minicucci

Re: Application for Permit No. 63-33454, Platt Gardens

Dear Ms. Minicucci:

The Idaho Department of Water Resources (IDWR) can process the above referenced application as soon as a few details are resolved. The application included a mitigation plan that appears viable without any changes. The application can be amended as outlined below. An edited copy of the application and a well log are also enclosed.

The basis for amending the application is the determination if storage should be formally listed as a proposed use. Although statutes and IDWR rules do not specifically address this issue in much detail, IDWR policy has followed the "24 hour rule of thumb" for many years. This policy indicates storage does not need to be listed as a use if a proposed rate of flow can fill the storage capacity in about 24 hours ($\text{per cfs} \times 2 = \text{af in 24 hours}$). Storage under those circumstances is not considered necessary as a formal use – instead it is informally noted in the file.

For this application, pond capacity is very minor and probably better described as a related note under the total municipal rate of flow, even if a lesser rate delivers water to the ponds. This simplifies the application, any related permit approval and eventual licensing.

Because the proposed changes are more form than substance ("IDWR jargon"), a simplified method to amend the application is offered in the enclosed worksheet. If this is acceptable, please sign and return the worksheet. The completed worksheet will be attached to the original application to verify the changes. Of course, you are welcome to submit an amended application form if you prefer that option.

Please let me know if you have any questions about the enclosed information. Thank you for your attention to this matter.

Sincerely,

Steve Lester
Water Rights Supervisor

Fee \$ 100- Received by DB Receipt No. W038869 Date 11-22-2010

APPLICATION 63-33454 WORKSHEET

The applicant confirms the details described below.

Municipal use from 1/1 through 12/31 at 0.15 cfs.

Municipal use includes irrigation of about 5 acres plus 5 minor ponds at the Platt Gardens, Boise Depot.

Ponds cover about 0.14 acre at about 1.5 ft. deep. The approximate 0.21 af capacity (0.14×1.5) can be filled within the IDWR "24-hour rule of thumb":

- $\text{cfs} \times 2 = \text{af per day volume} = 0.15 \times 2 = 0.3 \text{ af}$
- 24-hour fill volume exceeds pond capacity volume
- storage use n/a for proposed water right.

Municipal place of use is NWNW Sec. 15 & NENE Sec. 16. It is not necessary to list irrigated acres and ponds separately in the place of use chart since those uses are covered under municipal use.

A clarifying condition of approval will note that municipal use includes irrigation plus filling and maintaining 5 minor storage ponds.

Water bearing zone to be appropriated is 130-140 ft. (fully cased existing well 145 ft. deep, screened at 130-140 ft.).

This worksheet amends the application as noted above.

Steve,

Please find attached two mitigation plans submitted on behalf of the City of Boise, Parks and Recreation Department, in conjunction with permit applications 63-33341 and 63-33052 currently on file with the Department. The mitigation plans, executed by the South Boise Mutual Irrigation Company, Ltd explain that a portion of its water rights that authorize the irrigation of 40 and 6 acres respectively should be changed to mitigation to offset the depletions contemplated by the two pending permit applications associated with the Marianne Williams Park. I also attach a notated aerial photograph that shows the locations of the South Boise Mutual point of diversion and the diversion locations contemplated in the permit applications. As you can see, the location of the proposed Boise River point of diversion under permit 63-33341 is slightly upstream from the South Boise Mutual point of diversion, and there are no intervening PODs. Please contact me if you have questions or if you need me to submit any of the attached in hard copy. Please proceed with processing permit applications 63-33341 and 63-33052 pursuant to the attached mitigation plans.

Thank you,

John

**MITIGATION PLAN
APPLICATION FOR PERMIT 63-33052**

The City of Boise, Parks and Recreation Department ("Applicant") submits this plan to provide for the mitigation of the consumptive use of ground water that will occur as a result of the storage use proposed by the above referenced permit application. Mitigation is required because the proposed ponds, which will have a surface area of approximately 6 acres, will intercept and evaporate ground water that is tributary to a reach of the Boise River that is fully appropriated by senior rights except during times when upstream reservoirs are being emptied for flood control purposes.

This mitigation plan proposes to mitigate the depletive effects of the proposed ponds on the Boise River by ceasing the irrigation of six acres of irrigation under water right 63-243G, which is held in the name of the South Boise Mutual Irrigation Co., Ltd. ("SBMIC"). Applicant and SBMIC have an agreement whereby Applicant will acquire 6 SBMIC shares, each of which entitle the holder to the delivery of water sufficient to irrigate 1 acre at a rate of one-inch per acre. SBMIC agrees that the 6 acres associated with the 6 shares being acquired by Applicant will no longer be used for irrigation and instead will be used for mitigation of the permit 63-33052, and appropriate remarks on right 63-243G to this effect is authorized. SBMIC and the Applicant agree that the designation of a single water right held by SBMIC for mitigation under this Plan is for administrative convenience only, and that for purposes of actual water administration, Applicant's diversions made pursuant to 63-20041 are mitigated proportionally by all of SBMIC's water rights.

SBMIC has reviewed and approves this mitigation plan.

**MITIGATION PLAN
APPLICATION FOR PERMIT 63-33341**

The City of Boise, Parks and Recreation Department ("Applicant") submits this plan to provide for the mitigation of the consumptive use of water that will occur as a result of the irrigation use proposed by the Application for Permit no. 63-33341. Mitigation is required because the reach of the Boise River from which the Applicant proposes to divert under the permit application is fully appropriated by senior rights during the irrigation season except during times when the upstream reservoirs are being emptied for flood control purposes.

This mitigation plan proposes to mitigate the depletive effects on the Boise River of the proposed irrigation use of 40 acres by ceasing the irrigation of a corresponding number of acres of irrigation under water right 63-243G, which is held in the name of the South Boise Mutual Irrigation Co., Ltd. ("SBMIC"). Applicant and SBMIC (or assigns) have an agreement whereby Applicant will acquire 40 SBMIC shares, each of which entitle the holder to the delivery of water sufficient to irrigate 1 acre at a rate of one-inch per acre. SBMIC agrees that the 40 acres associated with the 40 shares being acquired by Applicant will no longer be used for irrigation and instead will be used for mitigation of the permit 63-33341, and appropriate remarks on right 63-243G to this effect is authorized. SBMIC and the Applicant agree that the designation of a single water right held by SBMIC for mitigation under this Plan is for administrative convenience only, and that for purposes of actual water administration, Applicant's diversions made pursuant to 63-33341 are mitigated proportionally by all of SBMIC's water rights.

SBMIC has reviewed and approves this mitigation plan.

To Whom It May Concern:

Enclosed please find an Application for Permit and a signed Resolution from the South Boise Mutual Irrigation Company. The Resolution is for the provision of mitigation water for the development described in the Application.

The Application is for the use of groundwater at the Boise Depot and adjacent Platt Gardens. The well was drilled in 1992 by Morrison-Knudsen Corporation under drilling permit 63-92-C-0773-000.

The mitigation for the Application will be in the form of SBMIC shares equal to the amount of water found to be beneficially used at the site. SBMIC will cease diversion of the equivalent water from the Boise River. SBMIC's diversion is upstream of the City limits, ensuring ensure that the equivalent water will be available to senior users who may be impacted by the water use at the Depot and Gardens.

Please contact this office at your earliest convenience if any additional information is required.

Sincerely,

Maria Minicucci
