

MEMORANDUM

Date: June 20, 2011
To: Water Right File 65-13842
From: cpadilla
Re: License Review

Currently the pond seems to be spilling over to the SESE of sec 9 whereas the field examiner recommended the POU to be in the SWSE only. Since the pond is only within the SESE QQ by 20 feet, I recommend licensing this right as recommended by the field examiner. Currently there is a 30-50 feet margin of error between the imagery and PLSS layers in ArcMap.

There are not any overlapping rights with the POU or PD.

Note that the application for permit was submitted the same day proof was filed.
