Cherie –

Irrigation at West Valley is typical sprinkler irrigated landscaping.

The well will be the primary source of irrigation. The city water will serve as a back-up source for irrigation. City water will remain as the primary source for domestic use.

Let me know if you have additional questions. Thanks.

Terry

Hi Terry,

I am working on licensing this permit and have a couple of questions to complete my review. Can you clarify the medical center's irrigation practices and what source of water is considered primary; the well or the city water? Thank you for your time and I look forward to finalizing my review of this permit.
