Subject: Model Results for Sorensen Water Bank application for W.R. no. 34-2428
Attachments: Model Run data entry.pdf; Model Run graphs above Milner.pdf; Model Run change ratio.pdf

Monica,

Attached are the results of the model run I performed for Mitch Sorensen's water bank application for water right no. 34-2428. Just so you are aware, when I ran the model, I assumed that the entire water right would be diverted at the new point of diversion. While this will likely not happen, I wanted to see what the impacts would be if the entire amount was diverted at the new point of diversion. As you can see from the results, it appears that there will no negative impacts anywhere on the river, even if the water right is diverted in its entirety at the new point of diversion. Thus, we can assume that whatever amount Mr. Sorensen diverts from the new point of diversion (up to the amount allowed by his water right), it will not have a negative impact on the river.

If you have any questions or need further information, do not hesitate to contact me. I appreciate your help on this.
