Subject: Stevenson

Stevenson Bros does not appear to have acres under CREP. Some pivot corners under 36-2727 and 36-7495 were included in the 2005-2007 mitigation plan. Other acres were not eligible. The acres were entered under the name of Kerbs; they were probably the operator. See the spreadsheet below.

Scott Stevenson had no acres under 36-7651 accepted to mitigation, but currently has some acres in CREP. I think he intended to enter some acres in mitigation, but (and this is a classic screw up which I did not go out of my way to fix) acres in the incorrect QQ were identified, in this case, acres under 36-7652 which belongs to Delis Farms just to the east.

Regarding Scott Stevenson, you will see that he had some acres excluded from CREP, primarily rocky outcroppings and this was because NRCS did not have them classified as irrigable, even though he had a valid water right on them. So we had recommended that these acres be placed in the water bank to protect them, as they would technically forfeit during the term of CREP. They are NOT rentable acres. Jeff P. has signed off on this, and I can't recall if you were around for these discussions. please see him if you have questions.

You can find the CREP shape at X:\spatial\irrigation\CREP.
