Subject: Permit 75-7601 - Jay Hart - Request for waiver to measuring device condition

Hey Nick,

I received a request for a waiver to measuring device requirement listed on 75-7601. The right falls within the Wild and Scenic watershed area. The permit currently includes the following conditions:

- 115 Prior to the diversion and use of water under this approval, the right holder shall install and maintain acceptable measuring device(s), including data logger(s), at the authorized point(s) of diversion, in accordance with Department specifications.

Michele and Cherie have each sent Mr. Hart a letter telling him that condition 115 is not the condition that would be added to a new permit today. The condition that would be added today reads as follows:

- 197 Upon specific notification by the Department, the right holder shall install and maintain acceptable measuring device(s), including data logger(s), at the authorized point(s) of diversion, in accordance with Department specifications.

Mr. Hart was told that we could change the condition on his permit from 115 to 197, if he requested in writing that we do so. Mr. Harts letter mentions that he discussed this issue with you:

"Request a waiver for a measuring device due to the small amount of usage. I discussed this with Nick Miller."

Based on Mr. Harts request, we can possibly issue an order to change the condition on permit 75-7601 from condition 115 to the more updated condition 197.

I am seeking your comment to make sure that is ok with you.

Thanks,

Craig

*6-15-11 : Spoke with Nick and confirmed with him that he
is OK with changing condition 115 to 197.*
