WATER RESOURCES
WESTERN REGIONSTATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
APPLICATION FOR PERMIT
To appropriate the public waters of the State of IdahoIdent. No. 63-334691. Name of applicant(s) Robert H West and/or Alasya N West Phone 208/939-0719
Name connector (check one): ☐ and ☐ or ☒ and/orMailing address: 5035 Willow Creek Road City EagleState Idaho Zip 83616-2011 Email: rhwest@aol.com2. Source of water supply ground water which is a tributary of _____

3. Location of point(s) of diversion:

Twp	Rge	Sec	Govt Lot	¼	¼	¼	County	Source	Local name or tag #
5N	1E	29		NE	SE		Ada	Ground water well	A0013248

4. Water will be used for the following purposes:

Amount .11 cfs for irrigation purposes from 3/1 to 11/15 (both dates inclusive)
(cfs or acre-feet per year)Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)5. Total quantity to be appropriated is (a) .11 cubic feet per second (cfs) and/or (b) _____ acre-feet per year (af).

6. Proposed diverting works:

a. Describe type and size of devices used to divert water from the source. 6" well and sprinkler system

b. Height of storage dam _____ feet; active reservoir capacity _____ acre-feet; total reservoir capacity _____ acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 11.

For dams 10 feet or more in height OR reservoirs with a total storage capacity of 50 acre-feet or more, submit a separate Application for Construction or Enlargement of a New or Existing Dam. Application required? ☐ Yes ☒ No

c. Proposed well diameter is _____ inches; proposed depth of well is _____ feet.

d. Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☒ Noe. If well is already drilled, when? 9/1984; drilling firm Dennis Phipps;Well was drilled for (well owner) Robert H and Alasya N West; Drilling Permit No. _____

7. Description of proposed uses (if irrigation only, go to item 8):

a. Hydropower; show total feet of head and proposed capacity in kW. _____

b. Stockwatering; list number and kind of livestock. _____

c. Municipal; show name of municipality or the applicant's qualifications as a municipal provider. _____

d. Domestic; show number of households _____

e. Other; describe fully. _____

8. Description of place of use:

- If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
5N	1E	29													3.5				3.5

Total number of acres to be irrigated: 3.5

9. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping? _____

10. a. Who owns the property at the point of diversion? Robert H and Alasya West Family Trust
b. Who owns the land to be irrigated or place of use? Robert H and Alasya West Family Trust
c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing: Robert H West and Alasya N West are Trustees of the Robert H and Alasya West Family Trust

11. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary. We will irrigate pasture for stock animals.

12. Time required for completion of works and application of water to proposed beneficial use is 5 years (minimum 1 year).

13. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½" x 11" map clearly identifying the proposed point of diversion, place of use, section #, township & range. A photocopy of a USGS 7.5 minute topographic quadrangle map is preferred.

The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

LEGAL NOTICE DEPARTMENT

IDAHO STATESMAN
PO BOX 40
BOISE, ID 83707

RE: Application For Permit No(s): 63-33052, 63-33341, 63-33469, 63-33474, 63-33481 & 63-32644

Dear Legal Notice Department:

Please publish the enclosed legal notice on the dates indicated (once a week for two consecutive weekly issues). If you cannot publish the notice on the proposed dates, please contact us immediately.

An affidavit of publication must be submitted to the Department along with the publication bill. Please send the affidavit and bill to this office before July 5, 2011. Your cooperation is appreciated.

Sincerely,

Denise Buffington
Administrative Assistant

The following application(s) have been filed to appropriate the public waters of the State of Idaho:

63-32644

STAR SEWER & WATER DISTRICT

PO BOX 400

STAR, ID 83669

Point of Diversion NWNW S16 T04N R01W ADA County Source GROUND WATER Tributary

Point of Diversion SWNW S8 T04N R01W ADA County Source GROUND WATER Tributary

Point of Diversion SWNW S11 T04N R02W CANYON County Source GROUND WATER Tributary

Use: MUNICIPAL 01/01 to 12/31 7.31 CFS

Total Diversion: 7.31 CFS

Date Filed: 4/11/2007

Place Of use: MUNICIPAL

Application previously published in June 2010 for 5 cfs. Now amended for higher diversion rate and priority date therefore advanced to 5/24/2011. Municipal use is for the district service area in Ada and Canyon Counties. Water bearing zone to be appropriated is 150-190 ft. for 1 existing well and 450-650 ft. for 2 existing plus 2 proposed wells. Proposed wells will be near Hwy 44/Plummer Road and Hwy 44/Kingsbury Road. Proposed use is for reasonably anticipated future needs in a 25 year planning horizon based on 1996 Municipal Water Rights Act (IC 42-202B etc.). Published in the Idaho Statesman & Idaho Press Tribune on 6/16 & 6/23/2011

Re: Application for Permit No. 63-33469

Dear Sir:

Reference is made to your letter dated May 23, 2011 in which you requested information to address the following:

- Will the proposed new water appropriation reduce the quantity or injure existing senior water rights?
- Is the water supply sufficient for the purpose for which it is sought to be appropriated?

I had my well drilled in September of 1984. A Well Driller's Report was filled in May of 1985 and is attached as it was to my application. I have been irrigating a portion of my land for the past 25 years with little or effect on the quantity or level of the water.

Dennis Owsley PG, Technical Hydro Geologist for the Department of Water Resources has been monitoring my well, Well log ID 05N01E29DADI, GPS Site ID Number A0013248, since March of 2009. I have attached a copy of Mr. Owsley's letter to me dated April 5, 2011. As you can see my water levels have been very stable.

In 1989 I applied for a water diversion of an existing water right. This application was later denied since my property was just outside the boundaries of that water right. I contacted your office after I was issued a Domestic Water Right for Domestic and Stock water 13,000 gal/day. In my discussions with your department I was advised that thru your mapping program that it appeared that my pasture area was a little over what I was allowed for a Domestic Water Right, but that should not be a problem.

I do not intend to increase my pasture area, but just want to obtain this new water right to be in compliance with IDWR regulations.

It appears to me that based on my 25 yrs of irrigating my limited pasture area, which is visible on my plot map submitted with my application that I will not reduce the quantity nor injure existing senior Water Rights and that there is sufficient water supply for the purpose for which my water right is sought to be appropriated.

I hope the above information satisfied your request or additional information on my application for a new water right.

Sincerely,

A handwritten signature in black ink, appearing to read "Robert H West", with a long horizontal flourish extending to the right.

Subject: Water level measurements in your domestic well

Dear Bob,

Below are the water level measurements we have collected from your well. The most recent measurement was collected at the end of March, with a reading of 228.81 feet below the top of the casing. To view this data and other water levels in the North Ada County area, please visit the website <http://www.idwr.idaho.gov/hydro.online/gwl/default.html>.

RE: Application for Permit No. 63-33469

Dear Applicant:

Our staff has begun the review process of your application received on January 14, 2011.

Your application is for ground water within the Boise River Basin #63. The proposed point of diversion is located above Star, where shallow ground water is a direct tributary to the Boise River. Although your application proposes deeper ground water, we have concerns about water availability and injury to senior water right holders nearby. Our office recently received 8 new water right applications in section 29 for irrigation use. There are already a significant number of existing ground water rights in the area, see attached summary of water rights and applications. The new applications individually propose small amounts of water; however, cumulatively the amount becomes large. Under Idaho Code 42-203A (5) our agency is required to evaluate new allocation applications by certain criteria. Please provide convincing information/data to address the following:

-Will the proposed new water appropriation reduce the quantity or injure existing senior water rights?

-Is the water supply sufficient for the purpose for which it is sought to be appropriated?

Please submit the requested information by **August 1, 2011** for processing to continue. You may request additional time by written request prior to the deadline. If you desire assistance in compiling the information, a list of local consultants is attached. The application will be ordered void without a timely reply.

Should you have questions, please contact me at the Western Regional Office, phone 334-2190.

Sincerely,

John Westra, Manager

Enclosure: consultant list, wr summary, map.

RE: Applications for Permit 63-33438 through 63-33444

Dear Lori:

We are in the process of reviewing the above applications for permit and find we almost have enough information to advertise them.

Each of these applications is located within Basin 63, above Star, where shallow ground water is tributary to the Boise River. Although these proposals are for deep wells we have concerns about water availability. Each of the applications by itself is not for a large amount of water, however, the cumulative amount of water when they are all considered is large enough that we need to have information to show that water is available for these proposals and that they will not injure senior rights in the area. We will not hold up processing pending submittal of this information but would request it be submitted prior to the protest deadline.

Application 63-33438 – Ed &/or Jan Camp

This application is for an existing well under Well Tag D0025193. We need to know what the water bearing zone to be appropriated is. We will also require an upgrade fee to change the domestic status of the well to irrigation use. An upgrade fee of \$125.00 is required.

Application 63-33439 – William M. &/or Lauren J. Dale

This application also lists an existing well but you stated you could not locate a well log. We believe we have found the log for this well. It is found under Well Tag D0025850. It lists the correct lot and block for Highlander Estates however, the written location is not correct. The legal on the log is "NWSW, S20, T5N, R1E", which would be in the section just north of the correct location. Unless we receive something from you that determines this well log does not pertain, we will assume the lot and block description is correct. The only way it can be determined is to verify the well tag number located on the well. This well was also drilled under a domestic drilling permit so we will need to

have a \$125.00 upgrade fee before the well can be used for irrigation purposes. We also need to know what the water bearing zone to be appropriated is.

Application 63-33440 – Dale Family Trust

No additional information needed.

Application 63-33441 – Beckman Estates, LLC (Lot 1)

We would like you to pinpoint where the domestic and stockwater uses will be located since the place of use falls into two 40 acre tracts.

Application 63-33442 – Beckman Estates, LLC (Lot 4)

No additional information needed.

Application 63-33443 – Beckman Estates, LLC (Lot 3)

No additional information needed.

Application 63-33444 – Beckman Estates, LLC (Lot 2)

This application also falls within two 40 acre tracts. Please indicate where the domestic and stockwater uses will be located.

Please submit the information needed for each of the individual applications within the next 30 days for processing to continue. We also request information concerning water availability be submitted, before the protest deadline, for final action to occur. The applicants may seek additional time to provide the information by making a written request to delay or interrupt processing. A response including the requested information, or a request for more time to seek the information, must be received within this time period. The applications will be voided without a timely written reply.

If you have any questions concerning this matter, please do not hesitate to contact our office. Thank you for your attention to these matters.

Sincerely,

KAY WALKER
Sr. Water Resource Agent
