Re: Water Bank submittal – Vandervegt-Gibson

Dear Mr. Marshall:

Enclosed please find an application to lease the above-referenced water right to the water supply bank. A portion of the currently-authorized place of use is being developed into a dairy facility, resulting in 124.8 acres out of production and available for submittal to the bank.

Water right 36-16469 is one of three irrigation rights within a 381.2-acre permissible place of use. The three rights are not overlapping, however, and the 124.8 acres are being taken only from 36-16469.

The enclosed aerial map shows the authorized acreage, the acreage irrigated in 2006, the limits of the dairy facility, and the irrigated acreage in each 40-acre tract after the dairy facility is constructed. The facility is under construction now and the acres submitted to the bank will be taken out of production this year. Please note that the small half-pivot in SWSE Section 6 is not shown on the 2006 photo but has been installed.

Please feel free to contact me if you have any questions.

Cordially,

Charles G. Brockway, P.E.

Cc: Irene Vandervegt
