Subject: RE: Watermaster Comment Request

This is ok. I agree with your analysis, except the rights are limited to 639.5 when used together. I didn't see right nos on the application (maybe I missed them) – will acres from each right be taken proportionately from the PPU?

Subject: Watermaster Comment Request

Hello Ms. Yenter
Watermaster of Water District 130.

I have a water bank lease request for water rights 36-7882B and 36-15360m, which appear to be located in water district 130. This lease is requesting to place 15.1 acres into the water bank from both of these water rights. No Rental has been proposed for these water rights at this time, and we will contact you when a rental for these rights have been received. My review of the 2006 and 2009 aerial photos suggest that the 15.1 acres was irrigated in 2006 and not irrigated in 2009 to the present. These aerial photos also show that the land that was actually irrigated is well within the 624.4 acres allowed to be irrigated by these water rights once 15.1 acres is removed by the water bank lease.

This is an invitation to let you comment on the proposed lease prior to the 15.1 acres being accepted into the water bank. We would appreciate any comments you may have, and request that submit those comments as soon as possible. If we do not hear from you in 14 days we will move forward with the water bank lease. I have attached a copy of the water bank lease for your review. If you have any questions, please don't hesitate to contact me.
