Re: RJ, LLC Water Supply Bank Application
Application to Lease a Water Right: 36-7934

Dear Monica,

Thank you for your time and assistance this morning to help us understand the challenges the water right listed above, presented to your department, and sort through our options for our client Mr. Richard Young.

Enclosed is the same, original Water Supply Bank Application and attachments, which was first submitted to your office, before the fee schedule was set into place. We thank you also for honoring the application original submission date, avoiding the now associative fees.

Below is from the original letter submitted December 20, 2010:

'Richard Young, authorized representative for RJ, LLC, would like to lease a portion of water right 36-7934, to the Water Supply Bank (WSB) as of this January 1, 2011. This letter and application are following the 4 Requests to Release Water from the Water Supply Bank for water rights 36-2449, 36-7835, 36-7523 and 36-7934 from Mr. Young, this same date.

Water Right 36-7934 is for 2.68 cfs with a total allowable acreage of 134.0. Since August 5, 2008, 16.2 acres of this water right have been in the WSB, with the remaining 117.8 acres annually under seasonal irrigation, in the POU for this farm.

Now with this water being released from the WSB, the full 134.0 acres are back with the water right. We would like to put 104.1 acres of water right 36-7934's 134.0 acres back into the WSB, drying the pivot corners as shown in the map included.

Please get back with either myself or Erick Powell if you have any questions regarding these release forms. Your time is appreciated.'

Sincerely,

Ann Pool, Hydrologic Technician

Enclosures: Application, Map, Water Right 36-7934, Registered Agent for Richard Young for RJ, LLC, Copy of Notarized Letter from Lien Holder (original in IDWR files)
