RE: Northside Main Canal, Proposed Hydro Project

Dear Ms. Huber:

I have examined the drawings for reconstructing a segment of the Northside Main Canal, that includes installation of an earthfill dike to redirect the flow to the proposed hydro plant. The dike appears to be a plug (to block flow in the canal segment to be abandoned) and is not considered a dam that is within the jurisdiction of this Department.

We appreciate your inquiry. Hopefully the copy of the Department's Safety of Dams, Rules and Regulations (copy provided) will answer any questions you may have regarding our jurisdiction.

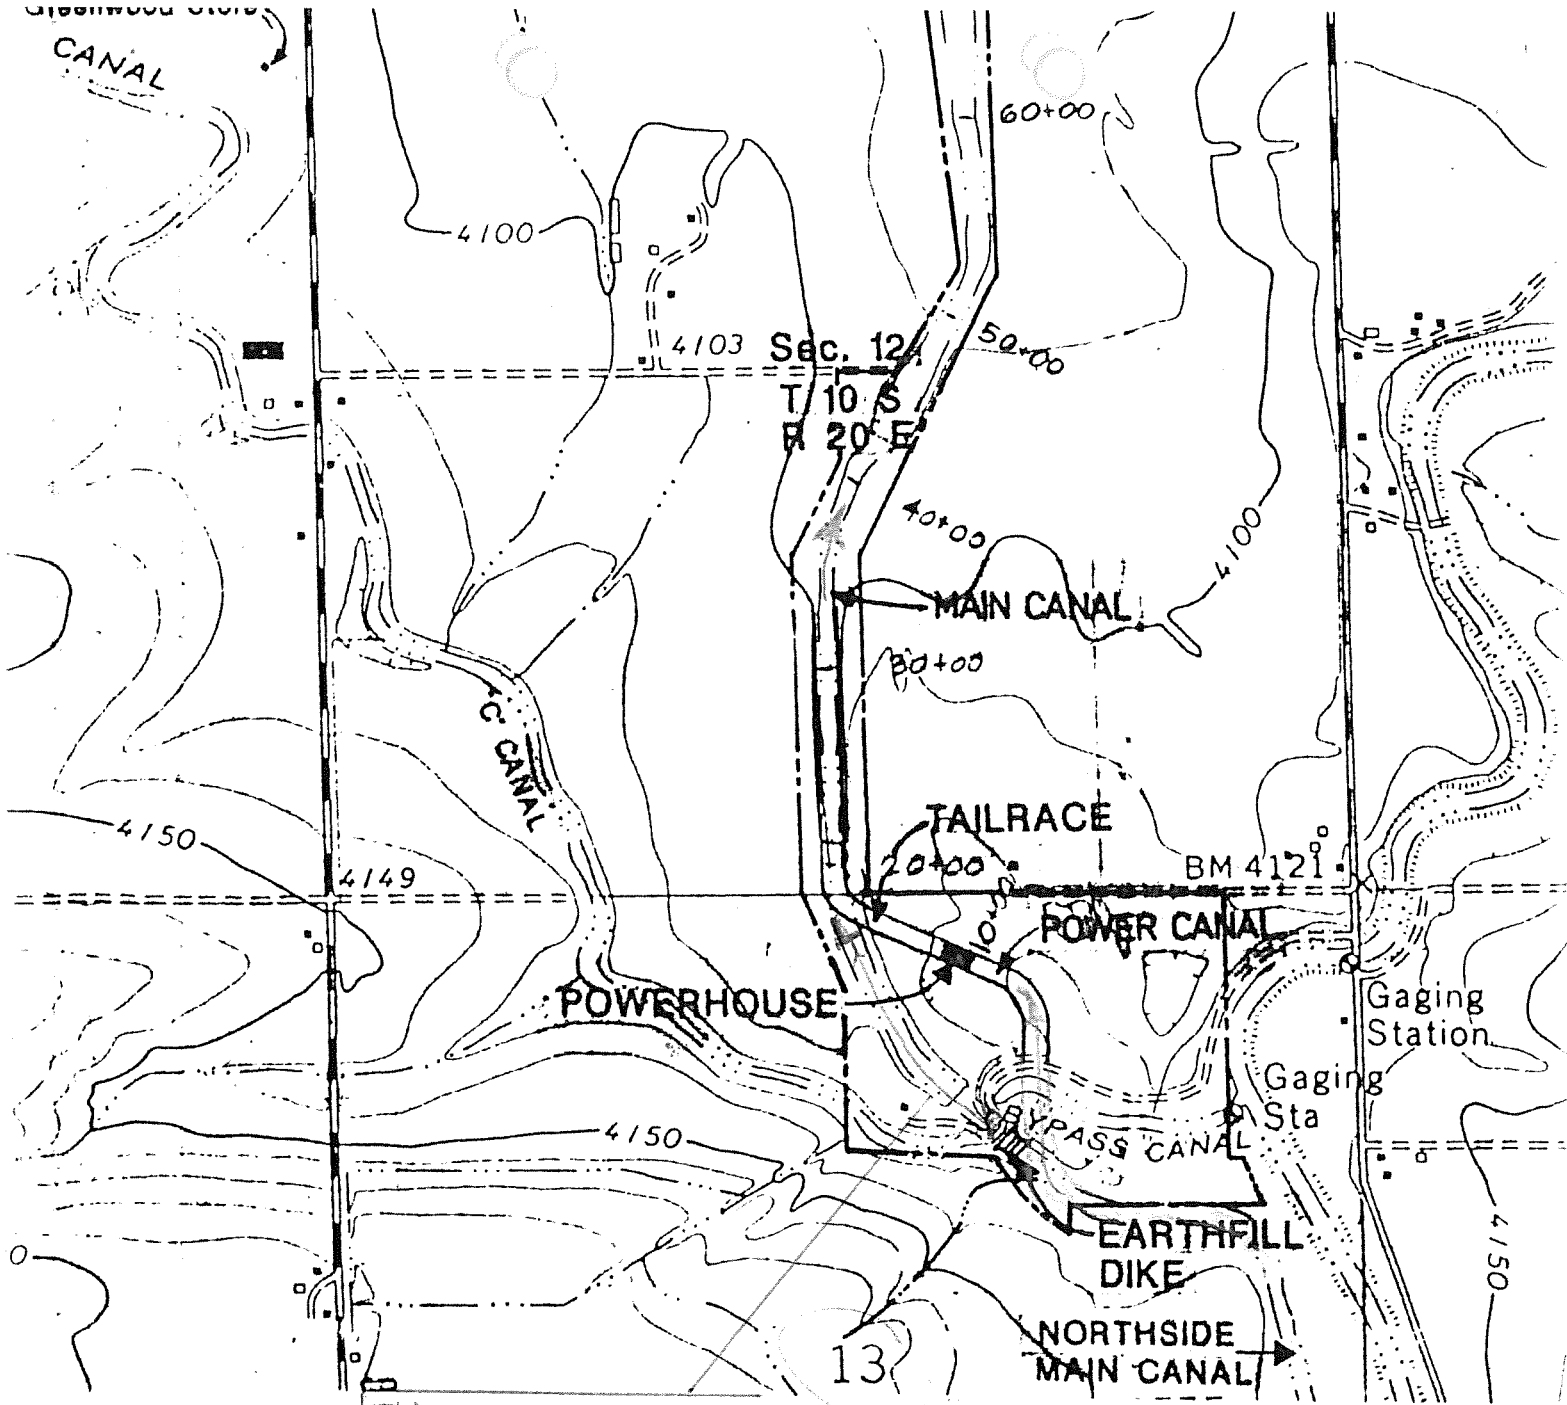

Very truly yours,

David H. Hollingshead
