T.J.,

It's been a while since we last spoke on these two permits so I thought I would touch base with you. I sent a letter at the end of October last year about the licensing of 11-7435 and withdrawals/modifications to amendments on 11-7435 and 11-7641 (11-7641 is Canyon Estates portion of what was 11-7481, split due to partial assignment of permit). I believe where we left off was:

- Confirmation the second well had been hooked up. During the exam the well was dug but no pump installed/not hooked into system
- Examiner found 33 stub-ins, however agrees that more could have been stubbed-in (permit was for 42 homes). If we have evidence those additional lots were stubbed-in before proof was filed on 4/20/08, the additional lots may be able to be included on the license for 11-7435. You were going to try and find evidence of this.
- The partial assignment of 11-7481 (now 11-7641) intends to add 14 homes into Canyon Estates. Are some of the 9 homes potentially missed by the examiner part of these 14 homes?
- With regards to the licensing amendment for 11-7435 (see first bullet of my October '09 letter) no fee will be required. If the permit amendment we still currently have on file for 11-7435 is withdrawn (the licensing amendment can accomplish changes), the fee paid for the permit amendment will be considered transferred over.

Please let me know where you are on these items. Thanks.
