RE: Water Right Permit No. 36-08723

Dear Mr. Morris:

Our office has recently started the process of licensing permit 36-8723. During preliminary examination of the permit, it was discovered that the point of diversion and the place of use appear to have been developed differently than described on the permit. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

Our office has drafted an Application for Amendment that appears to indicate the changes that will correct the permit. These amendments include the point of diversion that was originally described in the SWNWSW of SEC 5 TWP 08S RGE 14E. According to the Department's records a GPS point was taken on 8/6/2004 indicating the point of diversion is located in the NESESE of SEC 6 TWP 08S RGE 14E. In addition, the 125 acres for the permitted place of use do not exactly match the actual area irrigated at the time proof was filed and have been slightly shifted to reflect what is actually irrigated.

The enclosed Application for Amendment form depicts the water right as it will appear on the license when it is issued. Please review the amendment form carefully. If you have any questions please feel free to call me. Otherwise, please sign the Application for Amendment and return it with a \$50.00 filing fee within 14 days of receiving this letter.

Again, if you have any questions or need further assistance, please call me at 208-736-3033.

Sincerely,

Jana Reeder
Water Resource Agent
