Describe what work has been completed toward the development of this water right:
(This must be filled out! If no work has been completed, show "none".)

Well has been drilled and the pump installed and put into production, although the well was not drilled deep enough for adequate flow during the months with lower water table (Fall through Spring). The bowls are being lowered at this time to see if this will increase the flow during the drier months. Installation of well \$63,000.00, Lowering the bowls \$2500.00.

Costing \$ 65500.00

The permit holder(s) has been unable to complete the remainder of the work for the following reasons:

Unable to obtain adequate flow for industrial purposes especially when the water table is lower (Fall through Spring). If lowering the bowls does not produce the required flow, the well may need to be deepened or a new well drilled.

Permit holder(s) request an extension to July 1, 2015
