RE: Removal of a measuring device and lockable controlling works requirement for permit 65-22903 AND 65-22904

Dear Mr. Shurtleff,

The Department is reviewing water right permits 65-22903 and 65-22904 (permits) prior to issuing licenses.

The permit holders have requested a waiver from the measuring device and lockable controlling works requirement pursuant to the conditions of approval on the permits. The condition states:

Prior to diversion of water under this right, the right holder shall install a lockable device, subject to the approval of the Department, in a manner that will provide the watermaster suitable control of the diversion.

If the Department doesn't receive correspondence from you in opposition to removal of the condition within 30 days, the Department will assume that you are not concerned and will issue an order modifying the condition. The new condition will not require a measuring device and lockable controlling works until specific notification is given by the Department or the watermaster.

If you have any questions, please contact me at (208) 287-4944 and thank you for your time.

Sincerely,

Cherie Padilla, Sr. Water Resource Agent
Water Allocation Bureau
