RE: Water Right Permit No. 96-08686

Dear Permit Holder(s):

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. The examiner who verified your water use reported that certain elements of the permit have been developed differently than described on your permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

Based on the examiner's report, the following elements were developed differently than described on your permit:

☒ **Point(s) of Diversion**

☒ **Place(s) of Use**

☐ **Other**

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it with the \$50.00 filing fee within 14 days.

Also, to review our conversation conducted on April 19, 2011, you stated that you had no intent of filing another application for a permit for diversion to storage from the Hellroaring Creek, to the recreation storage (pond) covered through water right 96-8685. In accordance with Idaho Code 42-351 Illegal Diversion or use of water, the diversion to storage should cease immediately.

If you have any questions, please call me at (208) 287-4920.

Sincerely,

Sandy Hemenway
Sr. Water Resource Agent
