Re: Application for Transfer of Water Rights; IDWR Water Right Nos. 33-2054, 33-2075, 33-2076A, 33-2076B, 33-7007, 33-7053, 33-7061, 33-2119, 33-2125.

Dear Mr. Swank:

Enclosed for filing is an application to transfer a portion of the place of use for each of the above referenced water rights. The current place of use described under these water rights is irrigated using a combination of overhead center pivot sprinkler systems and hand line irrigation systems. To better manage the irrigation of this farm, we intend to dry-up certain areas currently irrigated with hand lines and install two new overhead center pivot irrigation systems. The acres to be irrigated with the new center pivots will be the same number of acres to be dried-up under the hand line systems.

In total, 242.8 acres and 5.19 cfs will be transferred. There is no proposed change to the existing points of diversion. The new place of use is owned by the J. R. Simplot Company and currently not irrigated. It is adjacent to the existing irrigated place of use described under these water rights. Enclosed is a check in the amount of \$450.00 to cover your fee for filing this transfer application.

Should you have any questions, or need any additional information in connection with the enclosed transfer application, please contact me. My phone number is 208-389-7359; email: vic.conrad@simplot.com.

Sincerely,

Vic Conrad
Land, Water & Asset Recovery
