Hmm, this is interesting. I have 24 acres in pivot corners in the mitigation plan 2004-2006 (see spreadsheet). There is no indication that the acres were also in WSB, which would not have been appropriate but that's moot now, I suppose.

However, 38 acres is really too much unless they are going to take out some of their pivots. Since 2002 they have consistently irrigated 267 acres of the 291, which is why we only accepted 24 acres into mitigation. I would recommend limiting the lease to the 24 acres or asking them to identify the additional 14 acres they plan on drying up.

Hi Cindy,

I have a lease app from Ilene Serr for 38 acres dating from December 5, 2008, presumably for the pivots. It was previously in the Bank from 2005 to 2007 and apparent in the Magic Valley Groundwater District water bank, according to the application. Do you have WM comment? If approved, the approval start date would be December 5, 2008.

Thanks!

Monica
