Subject: Permit 65-22912 - Request for extension to install measuring device

Sandy,

Scott King called regarding Jug Mountain Ranch. We gave them till May to put in the measuring device and due to the abundance of snow this year, they don't think they will have it done by may. Scott called Monica to warn us that they will be requesting another extension.

Monica, let me know if I am missing something.

Anyway, if you get it, I don't think there would be a problem in granting their extension but we can talk about it. We will see how long they want the extension for.

Later,

c
