

PHONE CALL 3/14/2011

I spoke with Mr. Karl Hays (NSCC's Jerome office) as a follow-up to my data request of 3/8/2011. He had received the email and gave me cell phone numbers for both of the current ditch riders and the authorization to request data from them.

I spoke to the ditch riders, briefly discussed the Y8 Hydro, which is, or was located on one of the ditch riders' property and requested Y canal flow data. I provided address, my fax and phone numbers and understood that they would provide the requested information.

As of the date of the licensing review memo, I have not received the expected response.
