5. General Information:

- a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future: The existing pipeline delivering water from Morse Creek has a lockable control valve. We will tie into this pipeline with 6" mainline system which will deliver to a 1,280' wheel line.
We will install Seametric magnetic flow meters (or similar rate/volume flow meter) on an above-ground portion of the mainline to measure flows and ensure compliance.
- b. Who owns the property at the point(s) of diversion? Bureau of Land Management
If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system: The POD for water right 73-65 is associated with a pipeline system that is used to deliver irrigation water to several other users. We have access to the POD via the right-of-way easement associated with this system.
- c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts?
If yes, ☒ Attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it Attachment #6. List the name of the entity and type of lien: Howard R. Cutler and Zella M. Cutler (husband and wife), mortgage to secure indebtedness. A statement from the lien holder is not needed since the transfer will not adversely impact the value of the water right or the property.
It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on this application may result in rejection of the application or cancellation of an approval.
- d. Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer: The ground currently irrigated by this POD is under a pivot and also covers some other portions of the property. The portion under the existing pivot will continue to be irrigated by the pivot by water rights we propose to exchange from water rights 73-44 and 73-46 (Patterson/Big Springs Creek, source). Portions not under the pivot will no longer be irrigated by 73-65.
- e. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use: Not applicable

f. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

Yes No

- ☐ ☒ undergone a period of five or more consecutive years of non-use,
☐ ☒ currently leased to the Water Supply Bank,
☐ ☒ currently used in a mitigation plan limiting the use of water under the right, or
☐ ☒ currently enrolled in a Federal set-aside program limiting the use of water under the rights?

If yes, describe: _____
