

MEMORANDUM

Date: April 04, 2011
To: Water Right File 74-7358
From: cpadilla
Re: Licensing Memo

POU

There are no other rights that feed into the trough that this right utilizes.

POD

There are two overlapping rights, 74-7025 and 74-14908, that divert from the same pipeline. The capacity of the pipeline is unknown so a combined limit is not going to be employed on this license. I will clarify the source from spring to Larkspur Spring since the overlapping rights identify this as the source.

Note that the field examiner identified the PD in Sec. 10 in the PLS table but his map shows the PD in Sec. 11. The overlapping rights list the PD in Sec. 11 so I will go with that legal description.

Volume

The volume for 75 cattle, off-stream, is estimated at 0.7 af. The field examiners handbook gives the following formula for this scenario as $(75 \times 0.0134) / 365 \text{ days} \times 245 \text{ days}$.

Rate

The rate as identified in the field examiners handbook is 0.02 cfs for 75 cattle.

Amendment Needed? Yes, the PD is in Sec. 11, not Sec. 10 as permitted.
