RE: Water Permit 22-7577

Dear Permit Holder(s):

The Idaho Department of Water Resources (Department) is reviewing the above referenced permit prior to issuing a water right license. The license will be issued pursuant to a field examination that took place on August 23, 1994 however there are a few details that should be clarified to ensure that the Department has a full understanding of the pond that is used for recreational fishing located at Township 5N, Range 39E, Section 2, B.M. Madison County.

The questions I have relate to the source of water that fills the pond, the location of that source and point of diversion. Please complete and return the questionnaire below to the best to your ability:

1. Is the Department's understanding that the pond used to be a gravel pit. When was the gravel pit filled with water? 25-30 YEARS AGO
2. The field examiner found three points of diversion (springs) that feed into the pond. Are the springs located within the pond? YES - IT IS SUB WATER
Please indicate on the enclosed map where the springs feed into the pond.
3. Is it possible that the gravel pit has been excavated so that the water table has been intercepted and filled the gravel pit? YES
4. Does the Texas Slough Canal or Cedar Point Drain feed into the pond? MAYBE

Lastly, I have enclosed an address change form for your use. Currently, the Department has an address of Box 731 in Idaho Falls on file while current tax lot data from the county reflects the address as PO Box 155 in Swan Valley. Please return the address change form to clarify your current address with a list of authorized agents for Crystal Pond Anglers Assoc. Inc. I appreciate your assistance in this matter and please let me know if you have any questions regarding this matter at (208) 287-4944.

Sincerely,

Cherie Padilla, Sr. Water Resource Agent
Water Allocation Bureau
