RE: Phone Conversation w/ Richard Clayton of Crystal Pond

Today I spoke with Richard to discuss the letter that I sent him on 2/22/11. He told me that the pond is lowered 5-6' each winter and when the fields begin to get irrigated the water fills the pond.

He told me that pond has been in place for 25-30 years and believes that the old gravel pit may have been partially filled with groundwater but could not say for sure.
