Irrigation relift pond at G&H Dairy, Wendell. Pond is located in NWNE Sec 18, T08S R15E, and sources filling the pond appear to be North Side Canal shares, dairy waste, and ground water. The waste lagoon for the dairy in NENE Sec 18 is situated immediately behind (south) of the relift pond. The incoming pipeline shown is from a well in SWSE Sec 7. The relift pumps appear to be serving irrigated lands in the E $\frac{1}{2}$ Sec 7 pursuant to right nos. 36-7409A and 36-7631A, and also lands in the S $\frac{1}{2}$ NE $\frac{1}{4}$ Sec 18 which do not have appurtenant ground water rights but which are within the commercial waste application area under G&H dairy right no. 36-8396. There is no irrigation at all found in NWNE Sec 18 pursuant to right no. 36-7847. The well for 36-7847 is presently not in use.
