

Memorandum

Date: March 31, 2011

To: File 21-7588

From: Craig L. Saxton

Re: Licensing Memo

Only two homes on the lots but the file examiner indicates that there is a one inch line running to each of the 4 lots. The recommendation of domestic use for 4 homes is based on the field examiners statement supporting that the two lots without homes do have water available to them...or are "stubbed" in.

Lots are over 4 acres in size. Lots that have irrigation water under other surface water rights could also have a domestic use that includes irrigation from the well in areas that cannot be irrigated from the surface water rights. Recommended domestic use for internal and external use as permitted.
