Hi Cherie:

Apparently the owner plans to link those together somehow. If it turns out he does not, we can drop the ground water if licensing. So for now, should be ok per his current intentions. We will proceed with issuing permit here.

Thanks for looking at this one. See you,

Steve

Hi Steve,

Happy Frayday (that's my new little way of identifying a payday on Friday—I thought it was pretty clever :0)

Anyway, I took a look at this permit and everything looks like it's ready to go! One question cropped up when I looked at the sources that sort of kept needling me; I see they are putting in for groundwater and surface water, when I was out there doing the field exam for the commercial right, I didn't see how the surface and groundwater could be used in the same system. Maybe they are planning on putting in a new system so they can be used in the same system? I've had a run in with Jeff Dean in the past and I don't want to bear any more bad news to him—not fun....so I want to make sure when I license this down the road I won't have to tell him to file for another permit.

I hope that made some sense, let me know if you want to discuss it further. Otherwise we are good to go. Have a great weekend.

Cherie

Cherie,

Could you parallel process this for Steve and give him some feedback?

*Ready to approve - see next pg - e cuml. 029
from IAFS letter*

Please let me know if you have any questions or want to talk something through.

Thanks,
c

Subject: Appl 78-12389 parallel processing

Craig:

Please take a look at this one to see if you have any concerns/suggestions. It's only 2 acres but includes Salmon-Clearwater processing. Application resulted from situation where rv camp was irrigating from river w/o a water right.

File scanned, appl advertised w/o protests. Everything looks good –

- IDFG & IDEQ ok (very good IDFG letter)
- SQ.Planning ok
- Review memo ok (Wild & Scenic n/a, minimum stream flow issues covered)
- Condition 029 will include detail @ IDFG 3/32" mesh
- Condition 01M used for future concerns (probable water district etc.)
- Condition 004 in case of issues @ access at river

Thanks & call if you want to discuss.

Steve
